DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-2 are rejected because the claim as written does not form a separator for a fuel cell. The claim as written discusses having carbon particles and thermoplastic particles which are made in a sheet-form in which a pattern is formed. This claim reads on a shaped article and not specifically to a separator in which is stated in the preamble.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Amano (JP 5-217711, translation and abstract).

Art Unit: 1745

Amano et al. teaches an inorganic filler is kneaded together with conductive particles (carbon black) and thermoplastic resin. Then is molded and put onto a metallic foil and then masking a necessary pattern onto the metallic foil. Amano teaches on page 2 of the translation in Example 1 that 60 volume % (564 g) of polyethylene *[about 40 weight %]*, 20 volume % (360 g) of carbon black and 20 volume % (468 g) of Boron nitride was used.
